

Brow Permanent Makeup Aftercare Instructions : Your brows will be healed within 7-10 days. Some individuals do experience minimal peeling/scabbing. This is normal; however, we want to prevent this as much as possible by keeping your brows hydrated and avoiding water contact! **Do NOT pick your scabs!**

Day of The Procedure:

- Immediately following your procedure your aftercare regiment begins by blotting the brow area with a wet cotton pad. We want to remove as much lymph as possible, so you do not scab. Blotting the area every 30 minutes for the first 3 hours (total of 6 times).
- After blotting, apply a thin layer of ointment to the brows.
- After the 3-hour duration, wash your brows using the soap given to you.
- VERY gently, apply the soap with a Q-tip, then blot with a wet cotton to remove the soap. Pat dry, then apply ointment.
- Apply ointment before bed

Day 2:

- Wash your brows one more time with soap as soon as you wake up. VERY gently, apply the soap with a Q-tip, then blot with a wet cotton to remove the soap. Pat the brows dry and apply a thin layer of ointment.
- Every 3 hours from the time you wake up and wash, blot your brows with a wet cotton pad, then immediately apply ointment to keep the brows hydrated.
- Repeat the blotting / ointment until bed.

Day 3-10:

- It is important that you continue to keep the brow area hydrated.
- It is recommended to apply ointment 4x a day.
- The ointment will help your skin regenerate faster **A THIN LAYER OF OINTMENT GOES A LONG WAY. (Size of a grain of rice - total for both brows)**
- If you experience scabbing or peeling (this is normal: your brows may appear “patchy”) please take a wet cotton pad and hold it on the brow area for 1-1½ minutes, then apply the ointment. This will loosen the scab and it will fall off on its own.
